**EMERGENCY
STOP**
1714527233

216091

216108

NOTICE: This hoist is equipped with a controlled descent device that will automatically engage in the event of a primary brake failure. Descent can be stopped with manual operation of the secondary brake.
WARNING: Risk of Injury to Persons if Unintentional Application of Power Sets Manual Crank Arm in Motion. Disconnect Electric Power Cord Before Using Manual Crank.

216104

WARNING :

Only authorized trained and physically fit personnel shall operate this hoist in strict accordance with the instructions on the hoist and applicable codes. Copy of instructions must be kept with the hoist.

CAUTION: IF THE MOTOR ENERGIZES BUT THE WIRE ROPE DOES NOT MOVE THROUGH THE HOIST, STOP THE HOIST IMMEDIATELY. Damaged wire rope may be jammed inside the hoist. Any attempt to move the hoist up or down could cause a dangerous situation and result in bodily injury.

**EMERGENCY DESCENT
DESCENTE DE SECOURS
NOTABLAß
DESCENSO DE SEGURIDAD**

Only in case of power failure. Push and keep the lever up.

To raise:
- Take off cap.
- Put hand-wheel.
- Rise up the lever and turn in the hand-wheel.

Nur bei Stromausfall benutzen. Zum Ablassen Hebel nach oben drücken.

Zum Heben:
- den Deckel am Motor öffnen.
- Das Handrad aufsetzen.
- Den Hebel heben und das Handrad drehen.

Uniquement en cas de panne de courant. Pousser et maintenir le levier vers le haut.

Pour monter:
- Enlever le bouchon.
- Mettre le volant.
- Lever le levier et tourner le volant.

Unicamente en caso de corte de corriente. Presione y mantenga la palanca hacia arriba.

Para subir:
- Levante el gancho.
- Introduzca el volante.
- Pulse y gire el volante.

INTRODUCTION
Ø9,5mm ou 3/8"

- Du câble de levage **A** : passer dans le galet, puis voir l'étiquette ci-contre.
- Du câble de sécurité **B** : Le câble doit être propre.
- Insérer puis pousser manuellement le câble **B** à travers le Securistop.
- Mettre en place 1 contrepois de 20 à 30 kg. of 20 to 30 kg.
- Essayer journalièrement le Securistop avant l'emploi de l'appareil.
- Main wire rope **A** : pass along the roller, then see label below.
- Secondary wire rope **B** : Keep cable clean.
- Insert and manually push the wire rope **B** through the Securistop.
- Install a counterweight of 20 to 30 kg.
- Test it every day before using the equipment.

- DEMONTAGE / DISMANTLING**
- 1-Descendre la plate-forme à quelques centimètres du sol
 - 2-Enlever le contrepois
 - 3-Enlever le câble de sécurité **B**
 - 4-Enlever le câble de levage **A**
 - 1-Take the platform down to some centimeters from ground
 - 2-Remove the counterweight
 - 3-Remove the secondary wire rope **B**
 - 4-Remove the main wire rope **A**
